YESON
VOICE
CENTER

Yeson Voice Center starting as Korea's outstanding and authentic voice care and phonoplasty center since 2003 is providing the most systemized and professional voice cares for all professional voice users including vocalists, singers, voice actors, announcers, actors and so forth yearly attracting around 15,000 patients (60% consists of professional voice users).

With highly advanced medical equipments
Yeson Voice Center is continuously providing
the world's best medical services.

Total Care Services for Voice

Yeson Voice Center provides
“total care service for voice”

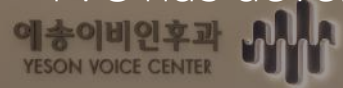

to help you achieve
a beautiful voice
by holding the consultation,
operation, therapies, rehabilitation
and examination in one place.

Many patients from more than 50 countries
are visiting Yeson Voice Center in the hope of improving their voice.

To be the most reliable voice care center,

 YVC has developed a Percutaneous EMG-guided injection laryngoplasty for the first time in the world,
established Korea's first and largest voice care center,
performed EMG-guided Botulinum Toxin injection for the first time in Korea,
performed Pulsed-Dye Laser surgery for the first time in Korea,
developed the world's best
and safest Voice Feminization Surgery called Vocal Folds Shortening
and Retro-displacement of Anterior Commissure,
got a patent on its Multichannel Phonokinetic Evaluation System,
founded China's first voice care center in Nanjing Dong-in Hospital.

**Yeson Voice Center is breaking the first record in the ENT field
and the effort to break this 'first record' will be continuously made.**
